

upcycle it! t-shirt yarn hanging

1 *create a simple frame*
we used a wooden dowel plus two inner circles from embroidery hoops of different sizes. glue at each connection point.

2 *design your artwork*
we used a combination of t-shirt yarn and regular yarn, but you can really get creative with your materials!

3 *how to tie the yarn*
cut your yarn into 24- to 36-inch lengths. double a piece of yarn (roughly in half), and lay it across the dowel. draw the free ends around the back of the dowel and up through the small loop at the fold in the yarn. pull to secure. experiment with it!
